Axles

Pro-Par axles are lightweight with a single-piece beam construction for a stronger and more durable product that meets the Pro-Par standard of quality. Backed by a 5-year limited warranty, Pro-Par axles are available in both beam & brake and dressed axles. Some key features include:

- **Seamless beam tube & single-piece beam**
 - provides a lighter weight, stronger beam with minimal welding for greater durability
- **Internally vented spindle plug**
 - reduces risk of taking in outside contaminants that reduce wheel end life
- **Hardened bearing & bushing journals**
 - creates excellent wear resistance, extending the life of your axles & camshafts, further reducing maintenance costs
- **Rolled spindle threads**
 - provides better dimensional control which allows for greater consistency for wheel bearing adjustment & improve wheel end performance
